

RENOVATION OF SANITARY FACILITIES

Improving hygiene in showers and toilets

Project overview

The sanitary facilities at the orphanage were in a severely dilapidated condition, making proper cleaning nearly impossible. Leaking faucets and broken toilet flush mechanisms compromised daily hygiene. To resolve this, all plumbing, sanitary fixtures, and wall and floor tiles were completely replaced. Additionally, tiling was extended to the floors of all other rooms in the facility to ensure a clean and uniform environment.

Before

Leaking faucets and defective toilet flushes compromised basic sanitation. Worn-out surfaces made thorough cleaning and disinfection impossible.

After

The complete renewal of all sanitary elements and plumbing fixtures has successfully restored a technically flawless and easy-to-clean environment. The newly tiled walls and floors significantly facilitate daily hygiene maintenance, allowing the children to use these essential spaces with a safe and positive feeling.

Project data

- **Location:** Orphanage Likoni AID for Children Centre
- **Project budget:** 280.000 KeS
- **Approximate value:** 2.000 Euro / 2.300 USD
- **Execution:** March 2026

Impact

Disease prevention, water efficiency as well as dignity and comfort have been the result.
