

ROOF REPLACEMENT AT SCHOOL

Improving safety and education conditions during the rainy season

Project overview

During the rainy season, the old corrugated iron roof had become damaged and leaked in several places. Water dripped into the class rooms of the Timbwana Baptist School, disturbing the ongoing classes or damaging school furnitures. Since repairs were no longer sufficient, the complete roof was replaced.

Before

The roof was leaking and water was entering the building, causing damage inside the class rooms.

After

A new roof was installed, providing reliable protection from rain and improving safety and comfort.

Newly replaced roof with improved protection

Project data

- **Location:** Timbwani Baptist Primary School
- **Project budget:** 215.000 KeS
- **Approximate value:** 1.450 Euro / 1.670 USD
- **Execution:** March 2026

Impact

The new roof has restored protection against heavy rain and helps create a safer, healthier environment for the pupils.
