

RENOVATION OF WASHING AREA

Complete tiling for higher hygiene standards

Project overview

Every day, the children's laundry as well as the dishes from cooking and dining must be washed multiple times in the rescue center. To achieve the required hygiene standards for these daily tasks, the entire washing area was thoroughly renovated and upgraded with durable tiling.

Before

In the past, the washing of laundry and dishes took place in an outdoor area surrounded only by rough plaster and bare stone walls, which made proper cleaning and maintaining basic hygiene extremely difficult.

After

Now that the entire floor and all surrounding walls have been completely tiled, all washing and cleaning activities can be performed in a highly hygienic, easy-to-sanitize, and technically optimized environment.

Project data

- **Location:** Likoni AID for Children Centre
- **Project budget:** 80.000 KeS
- **Approximate value:** 550 Euro / 630 USD
- **Execution:** March / June 2026

Impact

This renovation creates clean, professional, and easily maintainable conditions for daily chores, significantly reducing the risk of bacterial growth and dampness.
